FIG. 5L

**Figure 6**  
**Hierarchical organization and addressing of data**

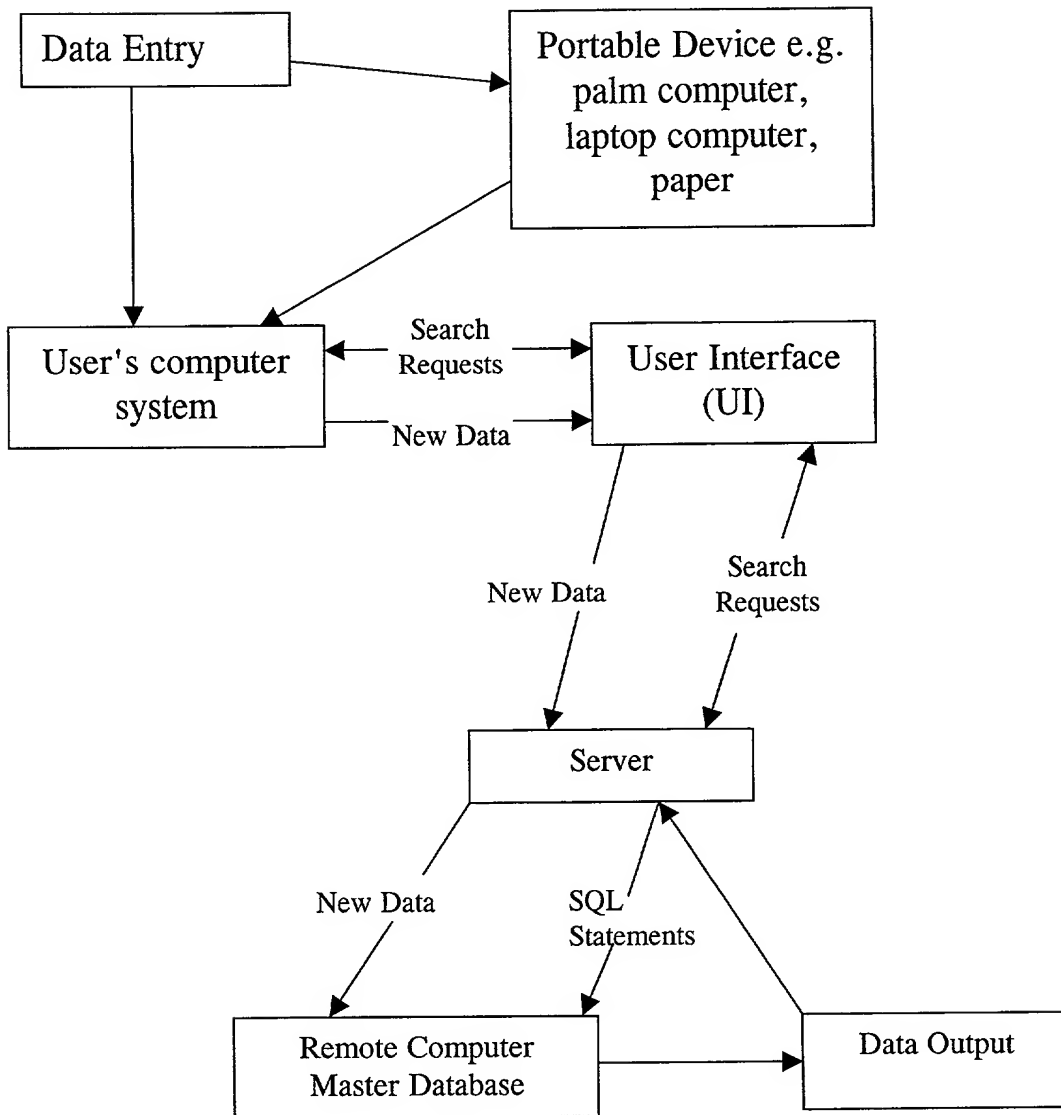

205020" 656/9001

The above example shows one possibility for numerical addressing. Other possible means of addressing include any sequence of characters that have logical order. Some examples are:

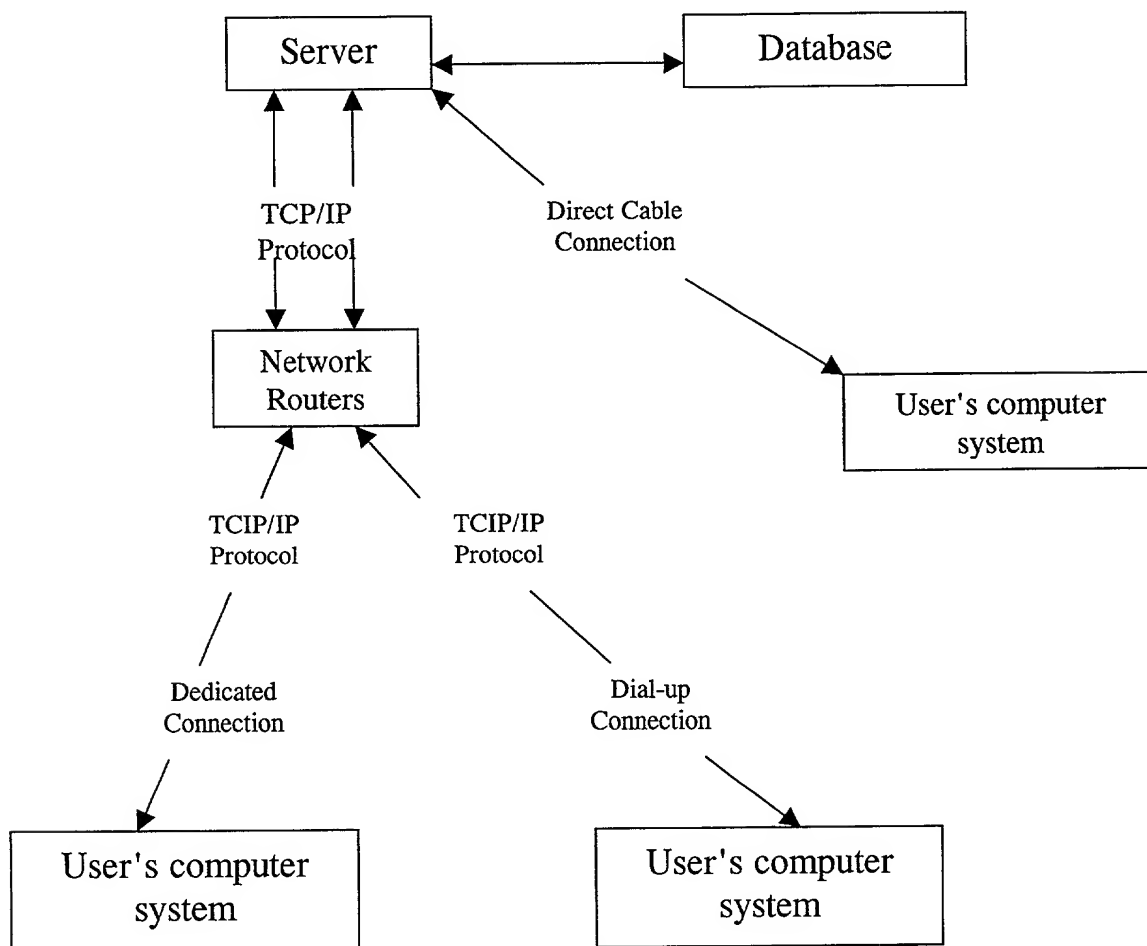

2.4.5.7.1  
24571  
BKJRT  
1, A, 5, T, 3

**Figure 7**  
**Possible organization of computer system using remote server**

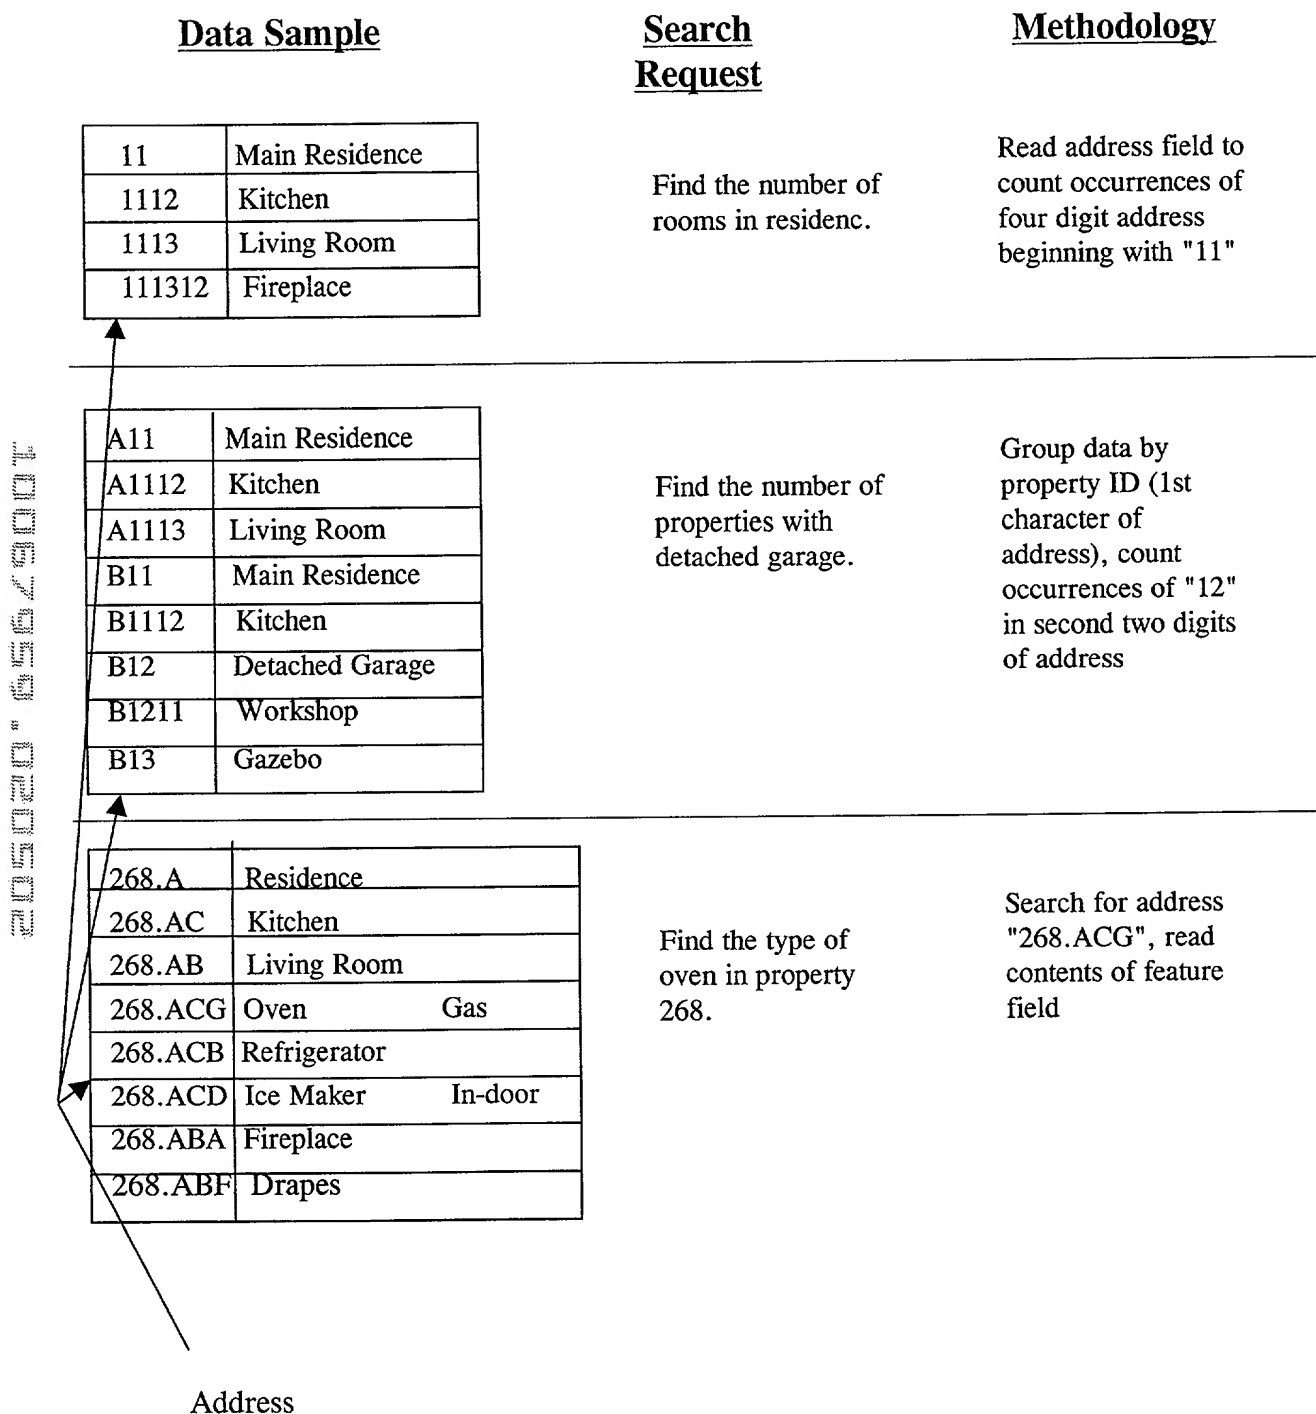

Note: for systems with local storage of the Database, the User Interface would interact directly with the database and the Server would not exist.

**Figure 8**  
**Possible organizations of ASP (Application Service Provider) systems**

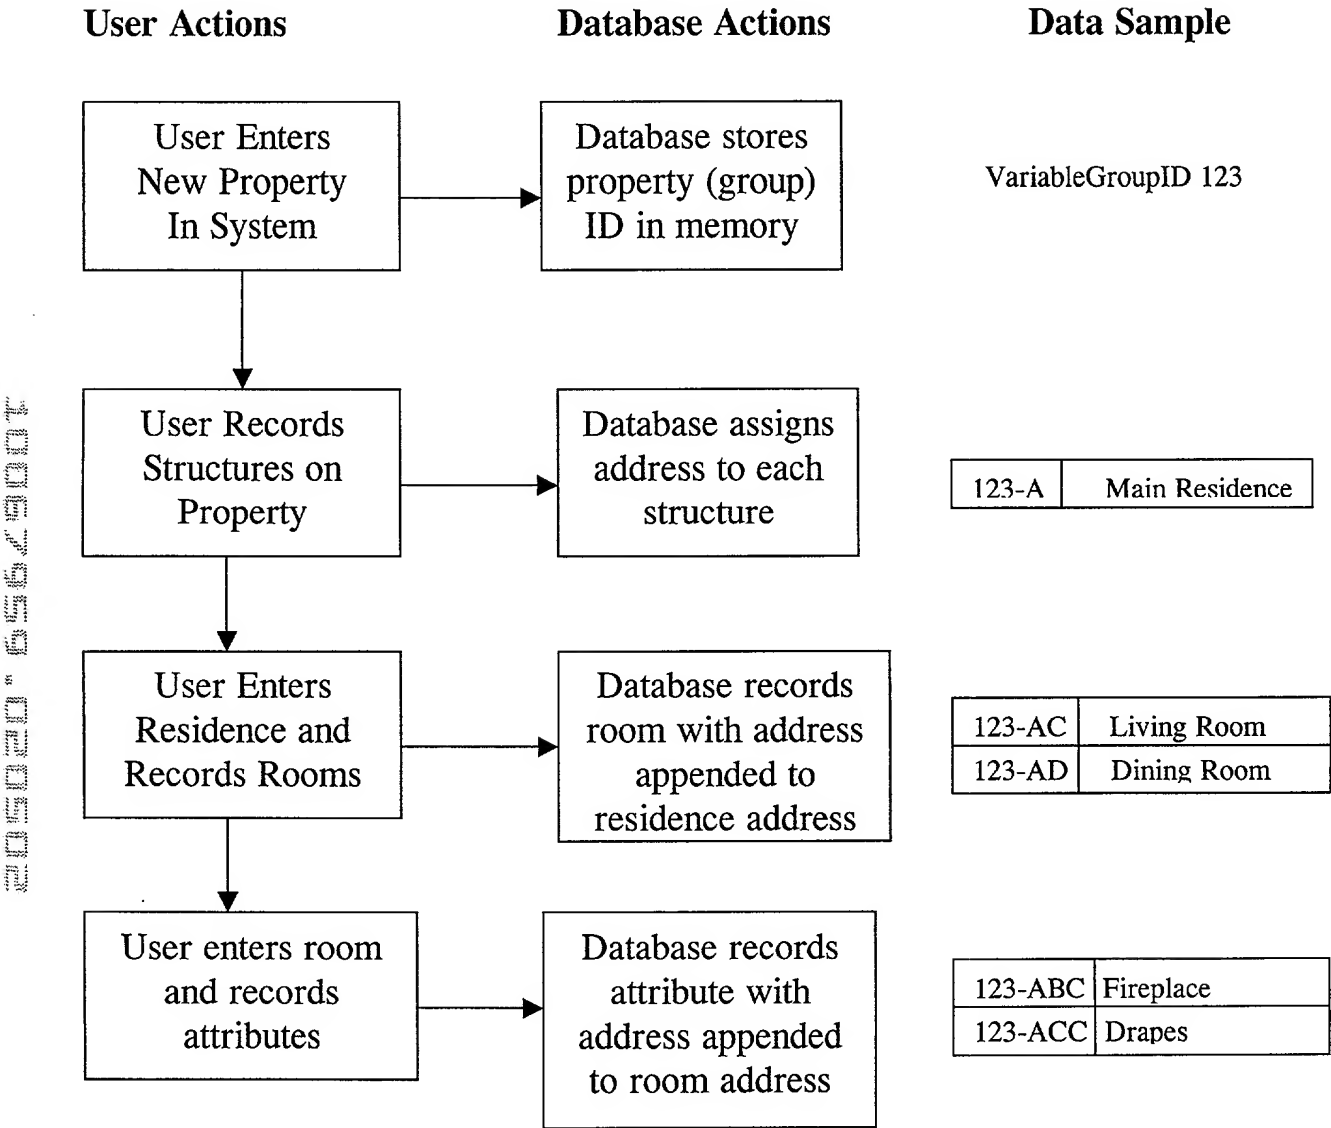

20250220 "6562" 9001

**Figure 9**  
 Search methods possible with hierarchical addressing

**Figure 10**  
**Assignment of addresses and record group (property) ID**  
**Using example of realty industry**

This figure uses alphabetical addressing. Numerical addressing or a combination of alphabetical and numerical can also be used. The group ID may also be stored in a field separate from the address. See Figure 5 for samples of numerical addressing with separate group ID.
